Quality That Goes Beyond The Label

Quality Built Into Everything We Do

At IVC, quality isn't just a department, it's embedded into every step of development and manufacturing. From ingredient sourcing to finished product release, our quality systems are designed to deliver consistency, safety, and confidence.

What Best in Class Quality Looks Like at IVC

From discovery to commercialization, IVC's integrated R&D process combines ingredient science, formulation design, sensory optimization, packaging expertise, and regulatory compliance to deliver consumer-relevant products that scale with confidence.

Integrated R&D Capabilities from Ingredient Discovery to Commercial Scale-Up

IVC's integrated R&D pathway connects ingredient innovation, product design, formulation, prototyping, scale-up, and commercialization support to help customers move from concept to market with confidence.

Ingredient Innovation

We identify, qualify, and de-risk novel ingredients, alternate sources, and delivery technologies through supplier collaboration and raw-material characterization.

Product Design Center

We translate customer and consumer needs into target product profiles, formulation strategy and concept feasibility alignment.

Formulation Expertise

We engineer robust, manufacturable formulas through excipient selection, process-system design, analytical review and sensory optimization.

Rapid Prototyping

We create bench and pilot prototypes quickly, evaluate early performance and refine concepts through iterative customer collaboration.

Scale-Up Readiness

We optimize equipment, process parameters and pilot-to-commercial transfer to support confident scale-up.

Commercialization Support

We support technical transfer, launch execution and lifecycle management to help products move from development through commercialization.

Consumer Insights Drive Better Innovation

Softgels

Premium Softgel Solutions

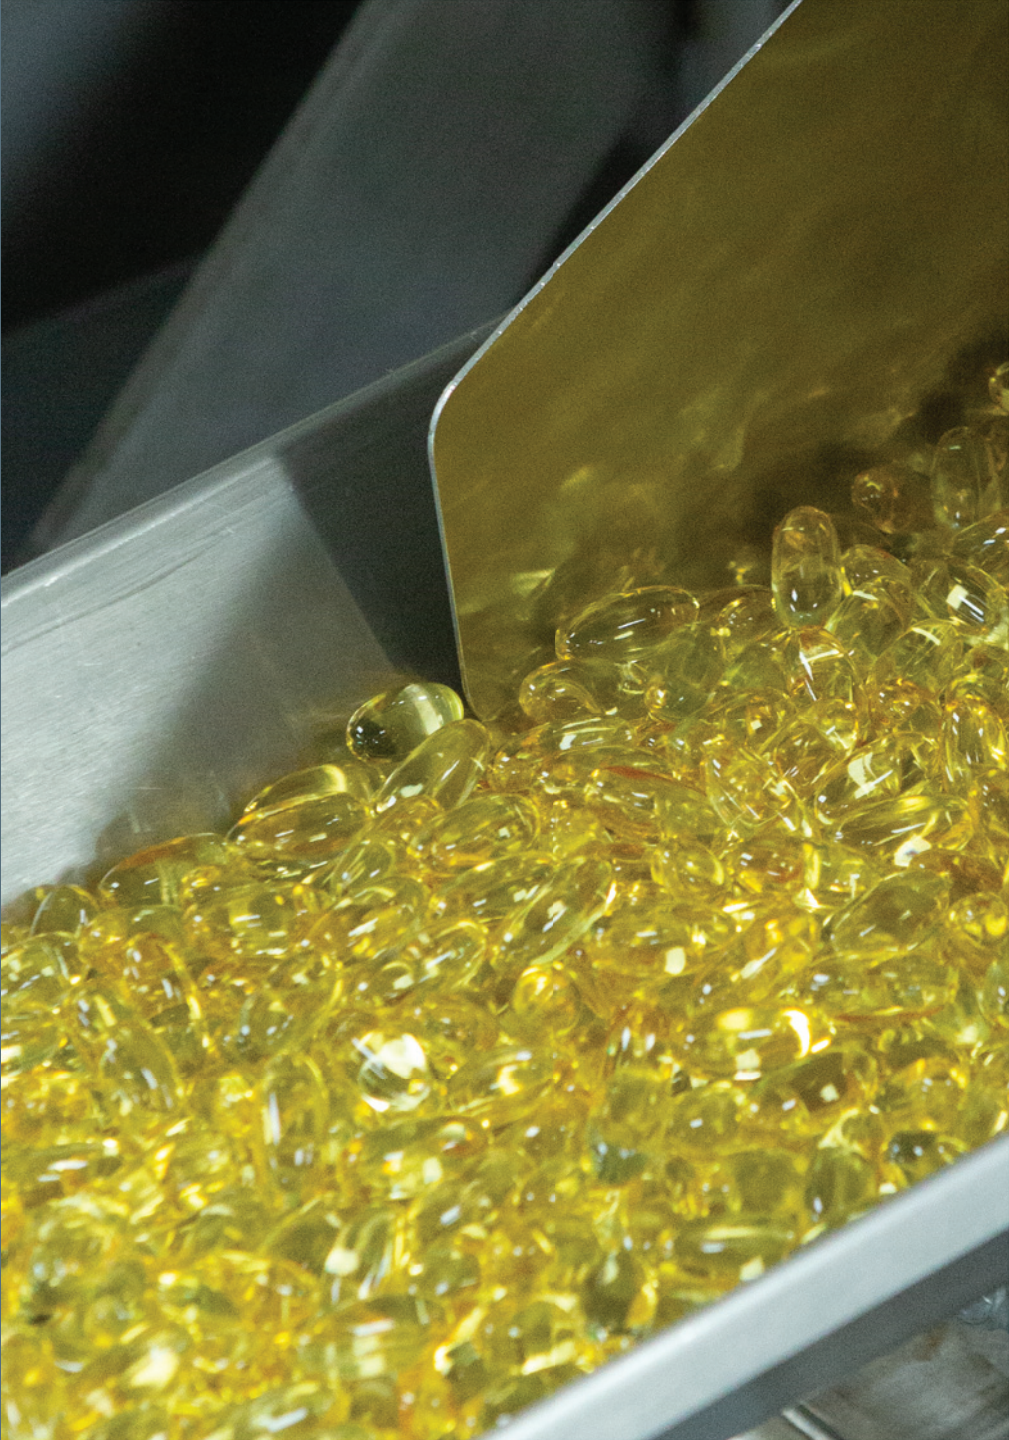

Softgels are a trusted choice for many of today's most popular supplements. With advanced manufacturing, formulation expertise, and scalable production, IVC helps brands bring innovative, high-quality softgel products to market with confidence.

Why Partner with IVC

- U.S. | 15 encapsulation lines | 9 billion capacity
- Flexible batch sizes
- Custom formulation & product development
- Premium gelatin colors & flavors
- Custom designs & sizes available upon request
- Enteric coating solutions
- Continuous & tray drying systems
- Direct dispense processing for single ingredient & small oil mixtures
- Premium fish oil processing
- Advanced automated vision inspection technology
- Laser printing & etching
- cGMP compliant manufacturing with comprehensive quality testing

Did You Know?

Softgels are one of the most popular supplement formats because they're easy to swallow, look premium, and are ideal for ingredients like fish oils, vitamins, and specialty nutrients.

Tablet

Manufacturing You Can Count On

Tablets are one of the most widely used supplement formats and for good reason. They're efficient to produce, easy to customize, and offer outstanding shelf stability. Whether you're looking for a high-dose vitamin, a multivitamin blend, or a time-release herbal supplement, tablets offer the flexibility and performance you need.

Why Partner with IVC

- U.S. | 24 compression lines | 22 billion capacity
- Flexible batch sizes
- Custom formulation & product development
- Clear, enteric, organic, vegetarian & flavored coatings
- Three continuous coating systems for high-volume efficiency
- Timed-release technology, fast dissolve & chewable
- Custom embossing for brand differentiation
- Various round, oval, caplet & animal shapes, sizes & colors available
- cGMP compliant manufacturing with comprehensive quality testing

Did You Know We Have Enhanced Coating Capabilities?

Our three continuous coating systems help us produce large-volume tablet programs more efficiently while delivering consistent quality and faster turnaround times.

Capsules

Versatile, Consumer-Friendly Capsule Manufacturing

Capsules are one of the most trusted supplement formats, offering clean-label options, precise dosing, and the flexibility to deliver everything from vitamins and botanicals to probiotics and specialty ingredients. Whether you're launching a new product or growing an existing line, IVC delivers high-quality capsule solutions backed by advanced manufacturing and expert support.

Why Partner with IVC

- U.S. | 8 capsule lines | 3 billion capacity
- Flexible batch sizes
- Custom formulations using your formula or one of our proven solutions
- Gelatin and plant-based capsule options
- Custom capsule colors from leading hard-shell suppliers
- Clean-label formulations with minimal excipients
- Capsule sizes ranging from 4 to 000
- Encapsulation of powders, granules, and beadlets
- High-speed manufacturing for small and large production runs
- cGMP compliant manufacturing with comprehensive quality testing

Did You Know?

Capsules are one of the fastest-growing supplement formats because they offer consumers a simple, easy-to-swallow option while giving brands the flexibility to formulate with a wide range of ingredients including clean-label and plant-based solutions.

Next-Generation Gummy Manufacturing

Gummies continue to be one of the fastest-growing supplement formats, combining great taste with a premium consumer experience. At IVC, our advanced starchless gummy technology delivers exceptional quality, consistency, and efficiency helping brands bring innovative gummy products to market with confidence.

Why Partner with IVC

- Dedicated U.S. gummy manufacturing facility coming soon
- Advanced V2 starchless metal mold technology
- Faster production with drying times of 4 - 6 hours*
- Superior shape accuracy & batch-to-batch consistency
- Longer shelf life with reduced moisture content
- Sugar-coated & oil-coated gummy capabilities
- Automated manufacturing with minimal product handling
- Sustainable manufacturing with reduced waste & lower energy use
- Custom formulations, flavors & product development including Zero Sugar, Zero Sugar Alcohol
- cGMP compliant manufacturing with comprehensive quality testing

Did You Know?

Unlike traditional starch molding, IVC's advanced V2 metal mold technology produces gummies with greater consistency, less waste, faster production, and a longer shelf life helping your products look better, last longer, and get to market faster.

*Versus 36 - 48 hours with traditional starch molding

Powder

Innovative Solutions for Today's Wellness Consumer

Powders are one of the fastest-growing supplement formats, offering convenience, customization, and endless formulation possibilities. From sports nutrition and hydration to healthy aging and daily wellness, IVC combines formulation expertise, advanced manufacturing, and flexible packaging to help bring innovative powder products to market.

Why Partner with IVC

- Dedicated U.S. State-of-the-art high-capacity blending & filling systems with 8 tons of capacity
- Flexible batch sizes
- Custom formulation & product development
- In-house flavor scientists specializing in custom flavor creation & taste masking
- Multiple packaging options, including canisters, gusset bags, sachets & stick packs
- Expertise across a wide range of powder formulations
- cGMP compliant manufacturing with comprehensive quality testing

Did You Know?

Powders are one of the fastest-growing supplement formats because they allow consumers to personalize their nutrition while delivering higher active ingredient levels than many traditional delivery formats.

Great Powders Start with Great Flavor

Flavor Matters

Great-tasting powders drive repeat purchases. Our in-house formulation and flavor experts specialize in developing custom flavor systems and taste-masking solutions that help create products consumers love to use every day. Start with our most popular flavor options or dream up your own custom combination - we're ready to bring your perfect flavor to life.

- strawberry lemonade
- blueberry pomegranate
- peach mango
- chocolate
- mango pineapple
- watermelon
- mango chili lime
- strawberry hibiscus
- blue raspberry
- vanilla
- fruit punch
- passionfruit tangerine

Did You Know?

Today's consumers expect functional powders to taste as good as they perform. That's why flavor development is just as important as formulation.

Packaging Built Around Your Brand

Every product is unique. If you don't see the packaging option you're looking for, our team will work with you to develop a customized solution from packaging format and labeling to graphics, tamper-evident features, and retail-ready configurations.

Don't See What You're Looking For?

Every brand is different and so are its packaging needs. IVC has a variety of sizes, shapes, colors and finishes. If you don't see the format you're looking for, just ask. Our team will work with you to develop a packaging solution that fits your product, brand, and business goals.

Flexible Powder Packaging Solutions

Powder Packaging

From single-serve sticks to retail-ready canisters, IVC offers flexible packaging solutions to help bring your product to life. Whether you're launching a new brand or expanding an existing portfolio, we'll work with you to deliver packaging that fits your product, your customers, and your business goals.

Why Partner with IVC

- Wide range of packaging formats including canisters, jars, pouches, stick packs & sachets
- Single-serve sticks available in cartons or gusset pouches
- Custom packaging solutions tailored to your brand & product
- Tamper-evident packaging options for added consumer confidence
- Brand customization including labels, graphics & packaging design support
- Flexible production to support new launches & commercial scale programs
- End-to-end packaging expertise from concept through commercialization
